

Digital Submersible Tote Heaters

Custom Heaters & Research's industrial submersible heaters can be used for heating totes or tanks and is simple to operate. Our industrial submersible heating elements are durable, temperature accurate and very efficient because the heat is delivered directly to the material itself.

FEATURES

- Overall length 19"
- T304SS construction
- PTC heating element - reduces chance of burn-out
- Power cord - SJTOOW - 15' long
- Power - 1800 watts
- 120 or 240V models available (Plug included with 120V, no plug on 240V)
- Can be used in plastic totes (bumpers protect the plastic sides)

WEATHER-PROOF DIGITAL TEMPERATURE CONTROL SYSTEM

- NEMA 4X Enclosure
- Process value & set point displayed
- Digital Temperature Controller shows process value, easy to operate
- 1000 ohm PTC temperature sensor

- **Check chemical compatibility with your fluid**
- **Not suitable for some heat sensitive liquids**
- **Not recommended for petroleum products and most solvents as it may corrode the cord**

DO NOT ENERGIZE PRODUCT WITHOUT BEING IMMERSSED IN FLUIDS
